

## SCHEDULE 6

### SUPPLIER SELECTION CRITERIA

Procedure no. EU /01/STS/ZZ/2011;EU/15/STS/ZZ/2011 awarding a contract in the open tender procedure:

#### Supply of 2 units of Quayside Crane ( 19 rows)

item	Supplier Selection Criterion	Maximum Scoring	Supplier 1	Supplier 2	Supplier 3	Supplier n
1	Price	70				
2	Quality of the equipment evaluated using the following criteria: average fuel or electricity consumption, service response time,	20				
3	Warranty period	10				
	Total scoring	100	0	0	0	0

- The price – maximum 70 points**, awarded using the following formula: (gross price in the lowest bid) / (gross price in the bid under consideration) \* 70. The calculated amount shall be rounded using the mathematical rule of rounding, with such a number of decimal places as necessary to differentiate the scoring granted to bids with different prices.
- The quality of the equipment – maximum 20 points.** The Tendering Committee members shall award from 0 to 20 points to each of the bids. The Contractor will be awarded:
  - Max. 10 points** for the average fuel or electricity consumption, using the following formula: (the lowest consumption of fuel or electricity) / (the consumption level under consideration) \* 10. The calculated amount shall be rounded using the mathematical rule of rounding, with such a number of decimal places as necessary to differentiate the scoring granted to bids with different prices.
  - Max. 10 points** for the customer service response time /identification of a defect/ less than 8 hours from the notification about a defect; if the customer service reaction /identification of a defect/ time is longer, i.e. above 8 hours - 0 points.
- Warranty period – maximum 10 points.** The Contractor will be awarded 2 points for each 6 months extension of periods referred to in point 3.4 of the Tender Specification(SIWZ) (the Contracting Party requires that all periods referred to in that point must be extended in the same manner) – however, not more than 10 points in total.
